Dear Sirs, Mesdames,

This is a letter to confirm that the above named patient is under my care.

Unfortunately she has been dealing with significant amount of stress and mood symptoms lately, which is very difficult for her to manage. She is a single mom and has 2 small children. She needs to work to provide for her family and this has been difficult as her kids are quite young.

Her mother is in Iran and she wishes to invite her mom to come to Canada for a visit and to help her. I support this idea and I believe that having her mother here for a visit can help her to reduce her stress and also help her with her children.

Thank you for considering her request.

Sincerely,

A handwritten signature in black ink, appearing to read 'Noosheen', followed by a long, sweeping horizontal line that extends to the right.
